PROFILE

Former Actor - now completely hooked Web Developer. Previously worked in many varied fields, but as soon as I wrote my first HTML tag, I haven't stopped wanting to learn more. Passion for learning new technologies and creating visually interesting, solidly functioning sites and apps. Excellent team player, used to working independently and thinking on my feet. Fast-learner, motivated and self-taught with excellent and proven communication skills.

PROJECTS - See code: github.com/jamesmp88

Covid-19 Tracker - bit.ly/364wWQ8

During the current world climate it felt appropriate to build an app to test my skills with a real world problem. This React App finds and clearly displays government data pertaining to a specific area.

Recipe-Finder - bit.ly/3oZCwf0

Web App tool that utilises the edamame API to display recipes based on your search criteria.

Munch - bit.ly/2TTM0u4

A business/restaurant finder that uses Yelp API to search and display business in your area.

Jim's Gym - bit.ly/2TZ4vgC

Gym Landing page built with Bootstrap to show classic corporate gym designs.
